Welcome Note

A warm greeting from Inivos international to all the eminent researchers in the sphere of breast cancer.

With tremendous contentment Inivos international invites you to attend Global Insight on Breast cancer research and advances during September 12-14, 2019, Rome, Italy. Worldwide there are many women and some men who are diagnosed with breast cancer every year, which affects their daily life in many ways depending on what stage it has been diagnosed and treatment they may get. As the cause of breast cancer aren’t fully understood, at the moment it’s not possible to know if it can be prevented.

Key Sessions

Understanding Breast cancer
Types of Breast cancer
Breast Anatomy and tumour biology

Psychological impact and rehabilitation of breast cancer patients
Mastectomy, prosthesis and breast reconstruction
Immunology and genetics
Myths and facts about breast cancer
Breast health education
Worldwide out of 184 countries 140 countries have reported cases of breast cancer in women. Breast cancer is now the most frequently diagnosed cancer in women apart from other overall cancers. Worldwide incidences of breast cancer has increased by more than 25% and mortality by 15%. Estimated breast cancer cases in this year (2018) is 266120 and estimated deaths are 40920. Female breast cancer is most commonly reported in middle-aged and older women. About 85% of breast cancers occur in women who have no family history of breast cancer and 5-10% of breast cancers can be linked to gene mutations (abnormal changes) inherited from one’s mother or father.
